

Greener Pastures

Grazing Management Ltd.

Education Services Available:

Year Round Grazing Systems- This full 3-day course is a business management school which includes economics, finances, human resources, grazing, cell design, grazing chart, and dormant season grazing. Two members of the farm unit are eligible to attend for the one tuition.

Intensive Cell Grazing – This two day grazing school looks into the grazing side of the full school. It still touches on some of the business management but not near as intense.

Grazing Day - A one day grazing school which teaches basic grazing principles and cell design. I would encourage a “Family Grazing School” as this has worked well in the past.

I also am available for speaking engagements in which I can speak on a variety of business and grazing topics.

Please contact us for information and costs about setting up a course in your area. All of the above courses are mobile and can be hosted anywhere in Canada.
